

SYMNET AGRO SOLUTIONS LTD

GREEN HOUSE AND SHADE NET SOLUTIONS

Green Houses

This high-quality polythene sheet is specially UV treated for durability and protection against harsh sunlight.

With a thickness of 200 microns, it provides excellent insulation and light diffusion, making it ideal for greenhouse applications.

Insect Nets

Our Insect Net is a high-quality, clear netting solution designed to provide effective protection in protected cultivation systems.

It helps safeguard crops against a wide range of insects and pests, making it ideal for use in horticulture, nurseries, and greenhouses.

Shade nets

Symnet Shade Nets are UV-treated to ensure durability and long service life under harsh sunlight conditions.

They are available in different shading densities ranging from 50% to 90%, designed to suit the unique requirements of various plants.

Our Shade nets measure 4x50m and 2x50m. Available in Black and Green colours.

IRRIGATION SOLUTIONS

Drip Irrigation

Symnet supplies and installs both single-emitter and double-emitter drip irrigation kits, tailored to the needs of small-scale kitchen gardens as well as large-scale commercial farms.

Our kits include high-quality driplines, mainline and sub-main pipes, and a full range of accessories and fittings such as connectors, filters, valves, and end caps ensuring a complete, durable, and efficient irrigation system.

Damliners

Our damliners provide reliable waterproofing and lining for water pans, ponds, and reservoirs.

They are durable, UV-treated, and resistant to harsh weather conditions, making them suitable for long-term water storage solutions.

They are available in different thickness options—0.5mm, 0.75mm, 1.0mm, and 1.5mm—to meet diverse farmer needs, from small-scale applications to large commercial projects.

Solar Water Pumps

Symnet Agro Solutions supplies and installs high-quality solar water pumps, available in both surface and submersible models.

Designed for reliability and energy efficiency, our solar pumps offer farmers a sustainable solution to irrigation by reducing dependence on expensive fuel and unreliable grid power.

SYMNET AGRO SOLUTIONS LTD

Harvest Crates

Symnet Crates are high-quality plastic crates that are stackable, nestable, strong, and durable.

Each crate weighs only 2kg when empty, with external dimensions of L63 cm \times W38 cm \times H30 cm.

They can carry up to 18kg of French beans or 25kg of tomatoes, making them ideal for transport and storage of fresh produce.

Mama Silage Bag A product of PIL RAGINGINDUSTRISLIMITED RAGING NOUSTRISLIMITED RAGING NOUSTRISLIMIT

Silage Bags

Silage Bag is a hermetic storage bag for farmers to solve the forage needs through storage of silage for their livestock during the dry seasons.

It can also be used for either in-door or out-door storage.

Trellising Twines

Symnet Agro Solutions provides high-quality trellising twines that help farmers keep crops off the ground, improving air circulation, reducing disease, and increasing usable space and yields.

Our durable twines are ideal for supporting vining and climbing crops such as tomatoes, cucumbers, squash, peas, and other vegetables.

CROP SUPPORT SOLUTIONS

Seedling trays

Symnet Agro Solutions supplies strong, durable, and UV-treated seedling trays designed to give young plants a healthy start.

Available in different sizes with 50, 128, 169, and 200 holes, our trays provide farmers with flexibility depending on crop type and nursery needs.

Coffee Nylex

Coffee Nylex is a special polythene paper used to cover coffee on Coffee beds.

Our Coffee Nylex are durable and UV-treated to guarantee value for Money to our Coffee Farmers

Tree Nursery Bags

Symnet Agro Solutions Ltd supplies high-quality seedling nursery bags widely used for raising seedlings of vegetables, flowers, and fruit trees.

Our nursery bags are durable, UV-treated, and designed to support healthy root development.

They are available in various sizes, thicknesses, and shapes to suit different crops and customer needs, offering flexibility for both small-scale gardens and large commercial nurseries.

POST HARVEST SOLUTIONS

Hermetic Bags

Symnet Agro Solutions supplies premium Hermetic Bags specially designed for the safe storage of grains and dried crops.

Ideal for maize, dried cassava, beans, and other cereals, these bags provide airtight protection against the Larger Grain Borer (LGB) and other storage pests —without the need for chemicals.

Tarpaulins

Symnet Agro Solutions supplies durable, waterproof tarpaulins that provide farmers with a safe and efficient post-harvest solution for drying a wide range of agricultural commodities, including cereals and pulses.

UV-treated and tear-resistant, our tarpaulins protect produce from moisture, dust, and contamination, helping farmers reduce post-harves losses and maintain grain quality.

Packaging Nets

We supply lightweight, durable, and highly visible net bags ideal for packaging fresh produce such as onions, tomatoes, and other farm products.

Designed for strength and ventilation, these nets help maintain freshness during storage and transport while providing an attractive presentation for the market.

KITCHEN GARDENING

Vertical Grow Bags

OurVertical Bags are durable made from UV-treated shade net material, designed for long-lasting use in vegetable production.

These non-biodegradable bags provide an innovative solution for space-saving farming, allowing farmers to grow more crops in limited areas while improving yields.

They are available in three sizes: small (30–40 holes), medium (60–70 holes), and large (100–120 holes), making them suitable for both household kitchen gardens and commercial urban farming.

Multi Storey Gardens

Symnet Agro Solutions promotes multi-story gardening, an innovative farming technology designed to maximize limited space while increasing vegetable production.

By growing crops vertically in tiers, farmers can achieve higher yields per unit area, improve resource efficiency, and enhance household food security.

This solution is especially well-suited for urban and periurban areas where land is scarce.

Planters

This are durable and portable containers used to grow vegetables in Kitchen gardens.

They are suitable for Urban farming as they occupy less spac and one can use them in the balconies to grow vegetables.
